

# SLAM TALKER™ INSTRUCTIONS

Creating the right sounds with fingertip control. Blow like you are gently fogging a mirror (not like a whistle). Simply press down on one of the ridges, to make the desired sound. To add inflection (variation in pitch) rock your finger slightly to make the sound slide up and down in pitch. The call is factory set for a “dominant buck” sound. The ridges allow you to select yearlings/fawns, does or immature bucks.

- \* For **bleats** and **grunts**, cover hole on mouthpiece and blow like you are gently fogging a mirror.
- \* For a **snort wheeze**, to challenge a dominant buck, place lips on end of mouth piece (leave hole exposed), block end of barrel and blow twice short and once long. PHHT - PHHT - PHHHHHHTT! Be ready for the impending action!
