

Buttolo™ SQUEEZE ME™ ELK CALL

The premiere elk call available anywhere in the world. The World Champion Buttolo Squeeze Me allows you to imitate a female elk in Rut and drive those bulls wild with passion. All you have to do is squeeze! Amazingly easy-to-use and extremely versatile, this adjustable volume call creates both standard sounds and multi cow/calf sounds. German crafted and tuned like a Swiss watch, the Buttolo Squeeze Me Elk Call carries a lifetime warranty.

INSTRUCTIONS:

1. Hold the call in your hand with small bulb facing away from you. Place thumb on top of the large bulb.
2. "Squeeze" the large bulb with your thumb. Practice by pressing the large bulb at various speeds to achieve your desired elk sound.

*** TIP:** Be sure to press the bulb all the way down to get the proper sound.

3. To adjust the tone of the call, move the small bulb in and out from the body of the call.

*** TIP:** Experiment with tones by covering one, two or all three of the holes of the smaller bulb.

Short Cow & Calf Sounds:

Depress the large bulb on top of the call 2/3's of the way down. Then press to the bottom of the call with moderate speeds. This duplicates the nasal sound that an elk makes. For cow sounds, make sure the small bulb is extended all the way out. For a higher pitched calf sound push the small bulb back to the large bulb. Caution: DO NOT depress too fast, this will sound like an alarmed bark.

Small Bull Chuckle: *Small bulb extended out*

Place the small end of the call into a grunt tube. Depress the large bulb on top of the call 2/3's of the way down and finish compressing rapidly 4 to 8 times to create a series of chuckles. This number will vary depending on the size of the bull.

Young Bull Bark: *Small bulb extended out*

Depress the large bulb on top of call 2/3's of the way down and give one quick squeeze. DO NOT over call.
